

## Hawaiian Bird Beak Adaptation Lab

Bird	Tool Name/Amount Eaten	Tool Name/Amount Eaten	Which Tool Was More Successful
Ae'o Eats worms	Tonges / 6 Turkey baster / 1	Tonges / 6 Turkey baster / 1	tonges
Palila Eats seeds	Pliers / 18 Tweezers / half a cup	Pliers / 18 Tweeters / half cup	Tweezers
I'iwi Drinks nectar	Sucker / quarter Pliher / 6 drops	Sucker / quarter Pliher / 5 drops	Sucker
Elepaio Eats insects	Tweezer / 1 Tweezers / 1	Spoon 30 Spoon / 40	Spoon
Nene Eats Berries	chopsticks / 12 Rulers / 17	chopsticks / 12 Rulers / 17	Rulers
Moli (albatross) Eats fish	Sucker / 1 stapler / half cup	Sucker / 1 Stapler / half cup	stapler
Koloa Eats small invertebrates	Strainer / full cup Spoon / half cup	Strainer / full cup Spoon / half cup	strainer
'Io Eats small mammals			

1. I think that the most versatile tool is the spoon because when you scoop up a insect you'll get more than one insect. I got evidence because it says full spoon full of whatever I got.
2. You could get more than one of your food. You won't starve. You could maybe defend yourself.
3. I would look for a different kind of food and taste anything.
